A Nervous Woman Finds Relief From Suffering.

You Can Not

Draw the line too sharply when you get your eyes fitted. There is only ONE pair of glasses that will fit your eyes. Approximate fitting should not be considered - should not even be referred to-when dealing with such delicate organs.

It is not fair to your eyes, nor to your pocketbook, to make the mistake of paying for glasses that are not ground for your own individual eye requirements. No matter what degree of merit they may possess as glasses, you have paid dearly for them unless they are ground absolutely accurately to correct the defect, and give you perfect comfort while you are wearing them.

To furnish these requirements, the person to whom you entrust your eyes must be fully capable of not only detecting the slightest irregularity of theeyes, but be in a position to over see the making of your lenses, and overseeing them, knows how they should be ground. As everyone knows DONOVAN'S alone possess the ability, facilities and knowledge for handling every detail of your case from the moment of beginning the examination to the time of delivery of the finished lenses, Here every operation of grinding is under the personal supervision of Dr. Donovan, assuring you the highest degree of satisfaction.
